SUMMARY

I'm a passionate developer with a deep interest in building clean, performant, and user-centric digital experiences. I believe in the power of minimal design and well-crafted code to communicate ideas effectively. With experience across mobile and web platforms, I bring a unique perspective to every project — blending technical rigor with creative sensibility.

I embrace the philosophy of **vibe coding**—a modern development approach where technical precision meets creative intuition. By blending AI-assisted tools with a strong design aesthetic, I rapidly translate ideas into fluid, highly polished digital experiences while maintaining clean and scalable architecture.

EDUCATION

Master of Computer Applications (MCA), DVR & Dr. HS MIC College of Technology (Autonomous)
(2024– 2026)

Bachelor of Science (B.Sc.), Gowtham Degree College, Krishna University (2021–2024)

PROJECTS/ EXPERIENCE

FREELANCING PROJECT

Project Title: *AOTMS – Academy Of Tech Masters*

Role: *MERN Stack Developer*

Duration: *[23 DEC 2025 – 23 JAN 2026]*

Team Size: *[4 Members]*

- Successfully completed a real-world freelance project in collaboration with a cross-functional team.
- Gathered and analyzed client requirements to design and deliver a scalable solution.
- Developed and implemented core features using [Technologies / Tools Used].
- Ensured responsive UI, performance optimization, and cross-browser compatibility.
- Coordinated with team members using Git/GitHub and followed best development practices.
- Delivered the project within the agreed timeline and met all client expectations.
